

FOR IMMEDIATE RELEASE

Rebild National Park Society Inc. secures \$25,000 Grant from Scan Design Foundation for Green Energy Study Tour 2024

Rebild, December 2023 — The Rebild National Park Society Inc is thrilled to announce that it has been awarded a generous grant of \$25,000 from Scan Design Foundation (SDF) to support the creation of an annual study tour: Green Energy Study Tour 2024. This grant underscores the Society's commitment to advancing business connections and networking based on sustainability which can foster international Danish and American collaboration in the green energy sector.

The Green Energy Study Tour 2024 is a pioneering initiative within the Rebild National Park Society aimed at promoting knowledge exchange, cultural bonds, and business networks between Denmark and the United States. This grant from SDF will play a pivotal role in enhancing the tour's impact by providing essential funding for logistics, educational resources, and participant engagement activities.

Key Highlights of the Green Energy Study Tour 2024:

Educational Excellence: The study tour will bring together American PhD students and researchers with Danish green energy companies, offering a unique opportunity for participants to gain firsthand insights into Denmark's innovative approaches to sustainability.

Cultural and Business Connections: Aligned with the Rebild National Park Society's mission, the tour aims to strengthen friendships and business networks between Denmark and the U.S., fostering a deeper understanding of sustainable practices and creating lasting connections.

Partnerships with Key Organizations: The Society has partnered with Aalborg University, Green Hub Denmark, and other influential organizations to ensure a comprehensive and enriching experience for all participants.

The \$25,000 grant from SDF will be instrumental in covering 50% of the traveling expenses of the participants excluding flight tickets. The Green Energy Study Tour will begin June 30th and end July 5th 2024. During that time the participants will visit Danish energy companies, network and match-making

"We are grateful for the support from Scan Design Foundation for the Green Energy Study Tour 2024. This generous grant brings us closer to realizing our vision of fostering international collaboration in sustainable practices between Danish companies and American stakeholders. Together, we embark on a journey to cultivate knowledge, strengthen cultural bonds, and shape a more sustainable future. This partnership proves the power of collective efforts in advancing global sustainability, and we extend our gratitude to SDF for being a catalyst in this transformative work." - Helene Christensen, Secretary General, Rebild National Park Society

"At Scan Design Foundation, we are delighted to support the Green Energy Study Tour 2024 by the Rebild National Park Society Inc. This innovative project aligns with our mission to advance Danish American relations and our strategic focus on environmental sustainability. Knowledge exchanges are vital to sharing the best innovative green solutions across borders. We value our partnership with Rebild National Park Society and are looking forward to witnessing the positive impact of the Green Energy Study Tour." - Line Larsen, Program Officer, Scan Design Foundation.
